The Ultimate Stand-Alone Composing Program

Introducing **MacMusic** for Commodore 64™

Enjoy the freedom of musical expression

Now even non-musicians can compose their own masterpieces with the help of the joy stick and a little imagination. No complicated commands or time-consuming procedures get in the way.

Draw it and hear it

Unlike other composing software, MacMusic lets you make music right away. What you paint is what you hear. A shape becomes a melody, a melody becomes a song. It's that simple!

5 menus help you explore your musical ideas...
